

CHARGING THE BATTERIES ON YOUR SPEED-I-JET

YOUR SPEED-I-JET COMES EQUIPPED WITH TWO AA BATTERIES THAT NEED TO BE PROPERLY CHARGED TO ENSURE PROBLEM-FREE USE.

THERE ARE 2 RECOMMENDED OPTIONS.

- 1) USE AN ADAPTOR SIMILAR TO THE ONE USED WITH A SMARTPHONE THAT HAS A MINI-USB. THESE ADAPTORS CAN BE FOUND AT MOST ELECTRONICS STORES LIKE RADIO SHACK.**
- 2) USE THE USB CABLE THAT COMES WITH THE SPEED-I-JET. THIS METHOD OFTEN TAKES LONGER AS EACH COMPUTER MAY DIFFER IN THE POWER OUTPUT TO THE USB CABLE. IF USING THIS METHOD DOES NOT GIVE YOU SUSTAINED USE AND POWER THEN USE OPTION 1.**

FULLY CHARGED BATTERIES SHOULD LAST APPROXIMATELY 60 DAYS ON STANDBY OR 20-30 DAYS OF REGULAR USE.

USE ONLY HIGH QUALITY RECHARGEABLE BATTERIES
